

● STEP 1 — Create Java Project

In Eclipse:

File → New → Java Project

Project name:

DS_RMI

● STEP 2 — Create 4 Java Files

Inside src create:

Calculator.java
CalculatorImpl.java
Server.java
Client.java

Paste your uploaded code.

● STEP 3 — Save All Files

Ctrl + S

● STEP 4 — Clean Project

In Eclipse:

Project → Clean

● STEP 5 — Run Server FIRST

Right click:

Server.java

Run As → Java Application

✓ Expected Output

Server ready...

⚠ Leave server running.

DO NOT stop it.

● STEP 6 — Run Client

Right click:

Client.java

Run As → Java Application

✓ FINAL OUTPUT

Result = 15

💬 What Happened Internally?

Server:

Created:

```
Remote calculator object
```

and registered it.

Client:

Searched:

```
"Calculator"
```

inside registry.

RMI:

Handled:

- network communication
- remote method call
- result transfer

automatically.

COMPLETE FLOW

```
Run Server
```

```
↓
```

```
Registry created automatically
```

```
↓
```

```
Calculator object registered
```

```
↓
```

```
Run Client
```

```
↓
```

```
Client finds Calculator
```

```
↓
```

```
Remote add() executes
```

```
↓
```

```
Result returned
```
